About

Hi, I'm Moses — a Product (UI/UX) Designer & Generative AI student with 2+ years of experience helping startups and businesses turn complex ideas into clean, conversion-focused digital experiences.

I specialize in designing user-first mobile apps and responsive websites that drive engagement, usability, and growth. From MVPs for early-stage startups to full-scale product redesigns for fast-scaling companies, I bring a sharp eye for detail, a strategic mind, and a commitment to measurable results.

Results that speak:

- Boosted user engagement by 40% through research-driven redesigns
- Increased onboarding completion rates by 30% through UX improvements
- Delivered over 5+ design projects for clients across Fintech, Health, Mobility, E-commerce sectors
- Helped startups successfully launch MVPs that attracted funding and user growth

Work Experience

Most Recent Experience

Team Lead – ArtConn

Startup Project
2025

- A mobile app that connects users with verified, local artisans for quick services

Team Lead – CourtSync

Startup Project
